About Us

Electro-Mechanic for Energy (EME) is a specialized engineering company delivering integrated solutions in Renewable Energy, Firefighting Systems, Electrical Infrastructure, and Light Current Systems.

We provide end-to-end services including design, supply, installation, testing & commissioning, and maintenance for industrial, commercial, hospitality, and banking sectors across Egypt.

MV & LV Panels

Key Achievements

Transformers & Substations

Challenges and Solutions

Power Distribution Systems

Supply of Original Electrical Spare Parts

MV & LV Panels

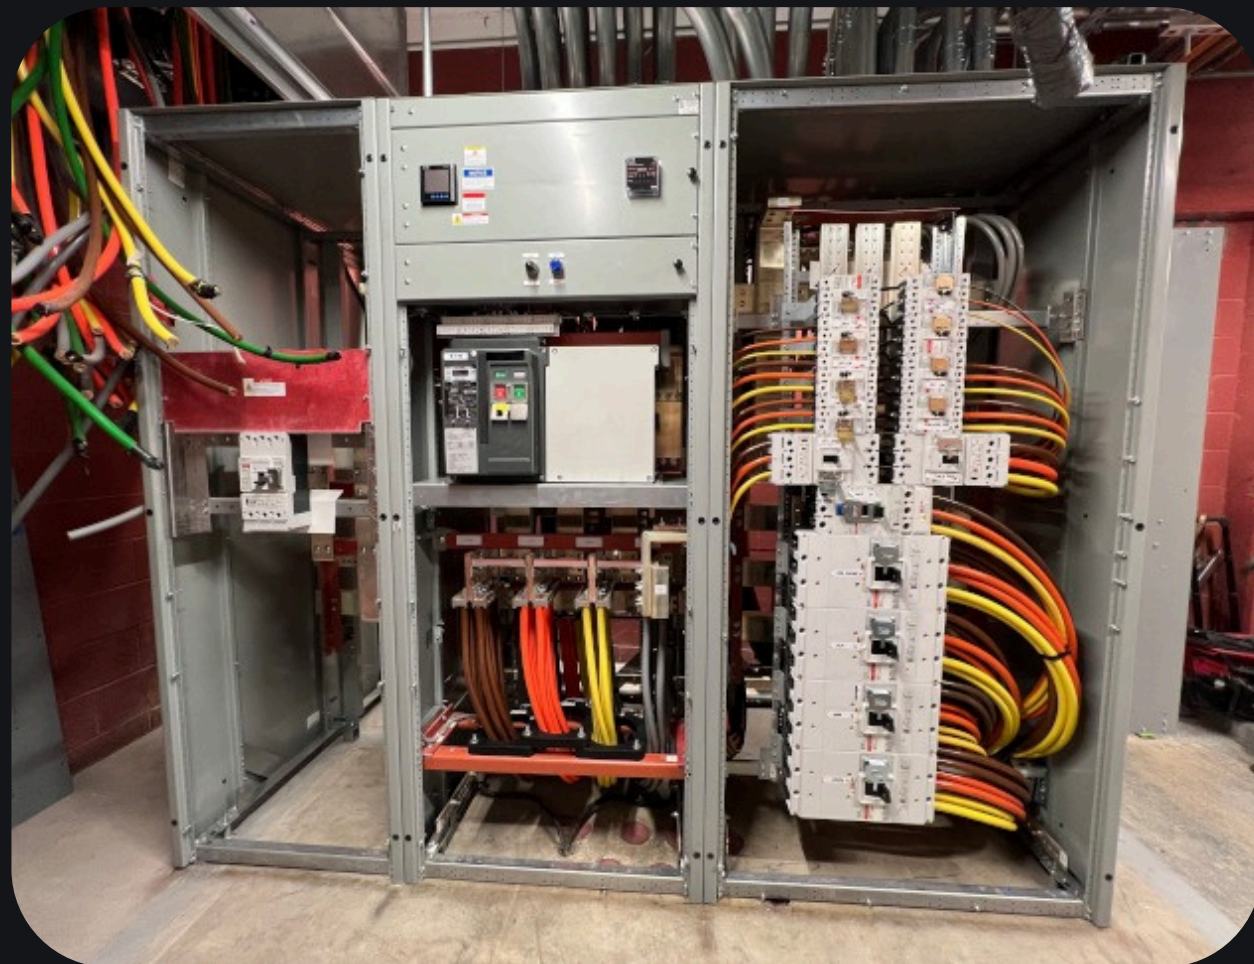

Design, manufacturing, supply, and installation of Medium Voltage (MV) and Low Voltage (LV) panels in compliance with international standards. Our solutions ensure safe power distribution, system protection, and operational reliability for industrial and commercial facilities.

Transformers & Substations

Engineering and execution of transformer installations and complete substation works, including civil, electrical, testing, and commissioning. We deliver efficient and secure power transformation solutions tailored to project load requirements.

Power Distribution Systems

Comprehensive power distribution solutions including main and sub distribution boards, busbar systems, and load management. Our systems are designed to optimize performance, ensure safety, and maintain continuity of operations.

Supply of Original Electrical Spare Parts

EME provides genuine and certified electrical spare parts for MV and LV systems, ensuring reliability, safety, and long operational life. Our scope includes circuit breakers, contactors, relays, protection devices, switchgear components, and control accessories from leading international brands.

We ensure fast availability, competitive pricing, and full technical support to minimize downtime and maintain continuous operation for industrial, commercial, and hospitality projects.
